

New Credentialing Partner

We are pleased to announce that we will be partnering with VerifPoint, a Credentialing Verification Organization (CVO), to assist in processing recredentialing applications. VerifPoint is a California-based company with an excellent reputation; in fact, some of our providers may already be familiar with them through other payors. We anticipate that using a CVO will increase the efficiency of our credentialing process and in some cases, eliminate duplication for our providers. CenCal Health credentials most physicians, podiatrists, and chiropractors every three years and VerifPoint may be contacting you in the future to obtain information necessary to complete the recredentialing process.

Our providers can be confident that all credentialing decisions will continue to be made by CenCal Health's Provider Credentials Committee, which is comprised of your physician peers in the community. Cindy Lansing, CPCS, CenCal Health Credentialing Specialist, will continue to orchestrate our credentialing process and is available for any questions you may have at 805.562.1670.

Thank you in advance for your continued cooperation with our credentialing process!
